Subject: Re: MLPA_CCRSG: Comments on MPA packages

Melissa,

Thanks for forwarding me the comments.

I noticed that the area from Alder Creek to Morro Bay seemed to be skipped over?

If possible please include my comments:

Cambria Area

Package 1

Should include increased protection for the waters off of UC's Ken Norris Rancho Marino Reserve just south of Cambria, to evaluate the effects of different management strategies to the north and south. In addition this site has ongoing research, is used by college level classe, has public access adjacent to it, includes marine mammal haulouts, pinnacles, kelp beds (giant and bull) and is an area of great biodiversity.

Not specific to sub-regions:

Package 1

It needs to include protection for some of the major headlands (Ex. Ano Nuevo, Big Sur, Piedras Blancas, Pt. Conception)in the Central Coast Region.

Also I will not be available for the SIG call in December.

Take care and enjoy the holidays.
